Summary

Motivated and detail-oriented web developer with a strong foundation in HTML, CSS, JavaScript, and modern front-end frameworks like React.js and Next.js. Recently completed hands-on projects demonstrating responsive design, API integration, and version control using Git. Eager to contribute to a dynamic development team and apply problem-solving and collaborative skills to build efficient, user-centric web applications. Looking for an entry-level opportunity to grow as a full-stack developer while delivering high-quality solutions.

Skills

- **Language:** JavaScript
- **Frontend:** React.js, Next.js
- **CSS Framework:** Tailwind CSS, DaisyUI
- **Backend:** NodeJS, ExpressJS
- **Database:** MongoDB
- **API Design:** Rest API
- **Payment Gateway:** Stripe, SSLCOMMERZ
- **Hosting & Deployment:** Vercel, Firebase, Render
- **Version Control:** Git
- **Tools:** Trello, VS Code, Chrome Dev Tool, NPM, Yarn, Vite, Figma, MongoDB Compass

Project Experience

1. Study Sphere (MERN Stack Project)

Live Link: <https://studysphere-cf030.web.app>

Github Client Repo: [Client-Side](#)

Github Server Repo: [Server-Side](#)

Admin Email: hasanmdtanvir001@gmail.com

Admin Password: hasanmdtanvir00

Features:

- Developed an admin dashboard to approve/reject tutor sessions, manage users, assign roles, and control session pricing.
- Enabled tutors to create sessions and upload study materials, with admin oversight on visibility and pricing.
- Implemented secure session booking and payment system using Stripe for students, ensuring access only after successful transactions.

- Provided features for students to take notes and track booked sessions.
- Ensured full administrative control over user management and tutor content moderation.

Technology Used: React.js, React-router, Vite, Tailwind CSS, daisyUI, Node.js, Express.js, MongoDB, Stripe, Firebase, Render, Recharts.

2. Shopfinity (E-Commerce Site Using Next.js)

Live Link: <https://shopfinity-sigma.vercel.app>

Github Repo: [Repo](#)

Admin Email: hasanmdtanvir001@gmail.com

Admin Password: hasanmdtanvir001

Features:

- Developed an admin panel to **create, update, and delete product listings**, acting as "posts" in the system.
- Enabled users to **search products, add selected items to their cart**, and proceed to secure checkout.
- Integrated **payment functionality using Stripe** to complete bookings and confirm orders.
- Implemented **real-time admin notifications** whenever a user adds products to their booking list.
- Built using **Next.js** for a fast, server-rendered shopping experience.

Technology used: Next.js, ReactJS, Tailwind CSS, Node.js, ExpressJS, MongoDB, Stripe, Firebase, Vercel.

3. Vital Drops (Blood Donation Site Using Next.js)

Live Link: <https://vital-drops.vercel.app>

Github Repo: [Repo](#)

Admin Email: hasanmdtanvir001@gmail.com

Admin Password: hasanmdtanvir001

Features:

- Developed admin features to **create and manage blood bank details and organize events** for donor awareness and interaction.
- Implemented a system where **users can post blood requests and respond or comment** on existing requests as donors.
- Enabled users to **search for blood banks and donors** based on blood group and directly **initiate contact**.
- Added functionality for users to **book hospital cabins** and complete the process through **secure online payment**.
- Built with **Next.js** to ensure a fast and responsive user experience.

Technology Used: Next.js, ReactJS, Tailwind CSS, daisyUI, Node.js, ExpressJS, MongoDB, SSLCOMMERZ, Firebase, Vercel.
